Vacuum: Means of Production, Measurement and Applications

Part 1: Tutorial and Education

Part 1A: Concepts

| | |
|---|------|
| Leaks: The Good, the Bad and the Ugly | 1-2 |
| The Speed of Sound, Shock Tubes and Potato Cannons | 1-10 |
| How Fast do Little Particles Fall in Vacuum? | 1-21 |
| Cartesian Divers: Clever Physics Demo, Toy and Pressure Gauge | 1-22 |
| From Cartesian Divers to PID Pressure Control | 1-28 |

Part 1B: Sputtering

| | |
|--|------|
| Sputtering Basics | 1-35 |
| Simple Sputtering Apparatus and Procedures from Early Publications | 1-38 |
| Simple Sputter Apparatus | 1-41 |
| Edison's Sputtering Patent | 1-44 |
| On the Electro-Chemical Polarity of Gases | 1-47 |

Part 1C: Education

| | |
|---------------------------------------|------|
| HVAC Vacuum Pump, Manifold & Chambers | 1-57 |
|---------------------------------------|------|

Part 2: Vacuum Hardware

| | |
|---|------|
| A Home Made Sprengel Pump | 2-2 |
| High Vacuum with Mechanical Pumps | 2-4 |
| The Editor Rebuilds His Vacuum System | 2-7 |
| A Puff Piece: Single shot and repetitive pulse valves | 2-13 |
| Design Differences in Thermocouple Vacuum Gauges | 2-18 |

Part 3: Vacuum Applications

Part 3A: More on Microwave Ovens

| | |
|---|-----|
| In Praise of Junkery | 3-2 |
| Scientific Apparatus Using Domestic Microwave Ovens | 3-4 |

Part 3B: Projects with Microwave Ovens

| | |
|---------------------------------|-----|
| Quick Drying of Woodturnings | 3-7 |
| Microwave Plasma Reactor Update | 3-8 |

Part 3C: Plasma Chemistry, Freeze Drying & Other Applications

| | |
|---|------|
| A Small Reactor for Plasma Polymerization | 3-10 |
| Frozen Free Radicals | 3-18 |
| Plasma Ashing | 3-20 |
| Freeze Drying: The art of prolonging the life of dead stuff | 3-23 |
| Two Freeze Drying Chambers | 3-29 |
| Homemade Propane Refrigeration System | 3-32 |
| A High Altitude Chamber for Biological Studies | 3-36 |
| Part 3D: Coaxial Plasma Accelerators | |
| Mini-F: A Small Plasma Focus Device | 3-40 |
| Materials Modification with the Coaxial Plasma Gun | 3-45 |

Part 4: Mass Spectrometers, Discharge Tubes and Beam Devices

Part 4A Mass Spectrometers

Home Built Mass Spectrometers 4-2

Part 4B: Discharge Tubes, Ion & Electron Beams and Plasma Devices

Discharge Tube Experiments with AC Potentials 4-11

Those Cool Bands in the Positive Column 4-12

An X-Ray Tube Prototype 4-14

An X-Ray Tube 4-17

Three Simple Vacuum Tube Projects 4-18

New Experiments on the Cathode Rays Jean Perrin 4-22

A Functional Thomson e/m Apparatus 4-24

Magnetic Deflection of Electrons using Vacuum Tubes 4-27

More on the Pseudospark Electron Source 4-29

Plasma Topics: Probing the glow discharge, the Thomson spectrometer, nuclear tracks 4-34

The Umac 606 Phantasatron (spoof) 4-45

Part 5: Neutron Generators

Neutrons and Neutron Generators 5-2

Crossed Field Neutron Source 5-11

The Farnsworth/Hirsch Fusor 5-21

More on Richard Hull's Fusor 5-29

IEC Update: Fusor Commercialization and New Applications 5-31

More IEC Patent Activity from George Miley & Co.: Fullerenes and X-Rays 5-37
